

Daisy Chain Bracelet

Supplies:

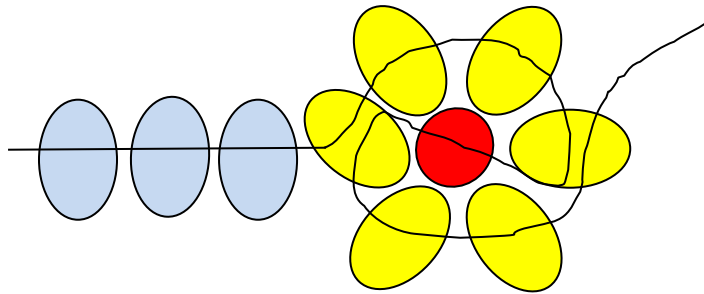

- Super-Lon, size 18
- Seed beads

You can use any kind of beads.

I usually use three different sizes for each bracelet (see photo).

Before you start stringing the beads, cut off two strands (braid strands) of 11" each. You'll need these to braid the cord.

Place your first flower about 15" from the end of your thread. Push each flower you add toward the previous one. Don't bother with their position and how they look too much.

When you're done adding flowers, tie a knot 5.5" away from the end.

Insert one of the braid strands before you pull tight. Adjust the lengths, braid and tie a knot. Pull tight.

Now you push all the flowers toward the finished end. Tie a knot, insert the braid strand, braid.

Maybe dab a little nail polish on the knots.
